5 to avoid for your car

These aren't bad tires. They're a poor match for your car, climate or mileage.

Poor fit for you

Summer performance tires

No grip below about 45°F. Unsafe for Minneapolis winters.

Poor fit for you

All-season tires with treadwear under 400

At 15,000 miles a year they'd likely need replacing within 3 years.

Poor fit for you

Tires with load index below 103

Below your CR-V's factory rating. Never fit these.

Poor fit for you

Mud-terrain tires

Noisy and slow-wearing on highways, with weak ice grip.

Poor fit for you

Any tire made more than 3 years ago

Ask for the DOT date code. Rubber ages even in storage.

One set or two?

In snowy places, a winter set can make sense. Here is the 5-year cost for your mileage, including installs and seasonal swaps.

Plan	Tires	5-year cost	Winter grip	Best for
One all-weather set	Northline AllWeather 2	$1,100 to $1,250	Good	Simplicity, no storage
All-season plus winter set	Halden Touring A/S + Halden Nordic W3	$1,900 to $2,150	Best	Icy commutes, hills, early mornings

Your maintenance plan

Rotate	Every 5,000 to 7,500 miles, about every 5 months for you
Alignment	Check at install, then yearly or after a hard pothole
Pressure	Monthly, cold, to the number on your driver's door placard
Replace at	4/32" for snow and rain safety. 2/32" is the legal minimum.
Age limit	Have them inspected yearly after 6 years, replace by 10

☐ Email me rotation reminders

Ask the shop before you buy

1. What is the out-the-door price for all four, itemized?
2. How old are these tires? Can I see the DOT date code?
3. Do these meet or beat my load index and speed rating?
4. What does the mileage warranty require?
5. Are rotations included, and how often?
6. Do I need an alignment? Can I see the readings?

What changed (version 2)

Moved up **[TIRE B]** to #1: longest life matters more because you're keeping the car 3+ years.

Removed **[TIRE E]**: over your $900 budget by about $140.

New **[TIRE F]** winter set on 17" wheels: about $210 cheaper than 18".

Urgent Your tires are from 2019 and near the legal minimum: replace before winter.
